

Tank Strainer Filter

Hosco's new Tank Strainer Filter assembly is designed to connect to most tanks and pumps in the finishing industry using a standard 3/8" NPS male x female connection. Constructed using all stainless steel components, this product is built to last.

The filter element has a reinforced stainless steel dual layer to provide support and hold shape. This design helps with extending the life of the product during cleaning and maintenance plans.

Benefits and Features

- All stainless steel components
- Can be purchased as a full assembly or filter element only.
- No plastic susceptible to cracking or breaking.
- No seals or gaskets to lose or misplace
- 1,500 psi working pressure
- Filter elements offered with a 100 mesh/149 micron screen and 60 mesh/250 micron screen
- 3.7 in² surface area of filtration
- Optional mounting bracket available
