

We deliver solutions beyond standards...

LSO Trade & Service GmbH offers engineered solutions for manual, automated and robotized painting systems in the General Industry, Automotive Industry and Automotive Components Suppliers Industry.

Our engineered solutions are driven by today's requirements to increase efficiency and flexibility, shorten color change times, reduce paint waste and usage of flushing media, etc.

The LSO Team brings more than 30 years of experience in the finishing systems segment.

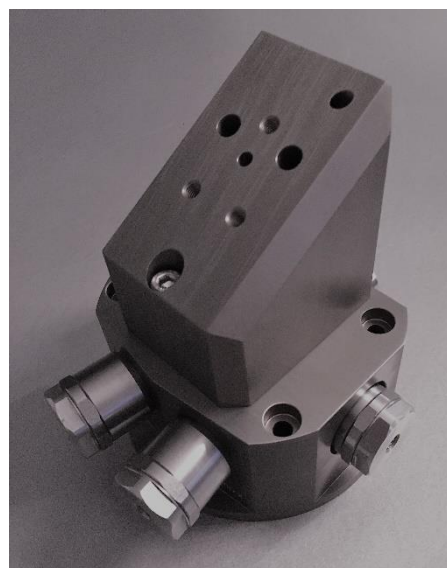

We also offer engineering services for our clients on a contractual basis.
